

Mills Says Enrollment To Rise

For the first time since the "veteran's bulge" following World War II, 7,000 students are expected on the UK campus, Dr. Robert L. Mills, registrar, said.

Dr. Mills said that for the first time in the history of the University, the total enrollment might go over 8,000. He explained that the total is made up of students on the campus, those registered through the College of Adult and Extension Education for campus credit, students at the Northern Center, and those registered in the College of Pharmacy. He said the figures do not include persons in extension classes and those registered for correspondence courses.

The on-the-campus enrollment for last year was about 6,400, Dr. Mills said. Enrollment for the 1955-57 school year is expected to increase about six per cent.

Dr. Mills remarked that although the UK enrollment was expected to reach a record high next fall, no new dormitories will be opened in September. He said that both Keeneland Hall for women and Donovan Hall for men were open and in full operation last year. The Cooperstown apartments for married students and faculty members are scheduled to be in full operation by September. Holmes Hall will be opened in September, 1957.

Dr. Mills said the increase in enrollment was caused by more high school graduates and a larger percentage of these graduates going to college.

He boiled the causes down to account for the increase thus: "There are more of 'em and more of 'em want to go to college."

Med School Architects Meet Willard

Dr. William R. Willard, newly named dean of the College of Medicine and vice president of the Medical Center, met with representatives of Ellerbe & Co. of St. Paul, Minn., consulting architects, and Meriwether, Marye & Associates, Lexington architects, to discuss plans for the new Medical Center this week.

According to Frank D. Peterson, vice president for Business Administration, the company representatives, Dr. Willard, President-elect Frank G. Dickey, President Herman L. Donovan, and other UK officials reviewed new plot plans for the school including the location of a housing unit, the College of Medicine, the School of Dentistry, a teaching hospital and a parking area.

Scale plans for the Medical Science Building and the over all plans for the hospital were also reviewed, Peterson said.

Definitive drawings for the Center will be available for architects Meriwether, Marye & Associates by Sept. 1.

Dr. Willard was appointed earlier this month to head the \$18,000,000 teaching and research center which will be built on a 39-acre site on the Agricultural Experiment Station Farm.

He is a Yale graduate and a former specialist in public health. He served for five years as dean of the Upstate Medical Center of State University of New York at Syracuse.

Dr. Willard took over his post on a part-time basis Wednesday. He will begin full-time work Sept. 1.

Library Hours

On Friday, Aug. 3, the library will close at 5 p.m. On Saturday, Aug. 4, the library will close at 1 p.m., and will be closed all day Sunday. Thereafter the schedule during the vacation period will be 8:30 a.m.-4 p.m. Monday-Friday; 8:30 a.m.-12 p.m. Saturday. Closed Sunday. The regular schedule will be resumed at 8 a.m. Sept. 16.

The Kentucky KERNEL

Vol. XLVII University of Kentucky, Lexington, Ky., Thursday, Aug. 2, 1956

No. 36

An Editorial

Kernel Doffs Cap To Donovan; Welcomes President Dickey

This is the last issue of The Kernel before the retirement of Dr. Herman Lee Donovan as President of the University to be succeeded by President-elect Frank G. Dickey. In retrospect toward Dr. Donovan and in confidence in the future under Dr. Dickey, The Kernel is filled with gratitude for the good fortune the University has, and has had, in its choice of leadership.

President Donovan led us to the "Threshold of Greatness." We believe implicitly in the brightness of our future under the leadership of President Dickey.

Material, scholarly, and cultural gains have been so many during the administration of President Donovan that any summary must have reportorial gaps. However, The Kernel cannot overlook its new home, the Enoch Grehan Journalism Building which houses the School of Journalism, Student Publications and The Kernel Press. Nearby is the imposing Fine Arts Building of which Dr. Donovan is justly proud.

Keeneland Hall, a new dormitory for women, was established by him; there is under construction Holmes Hall, a fifth dormitory which Dr. Donovan was instrumental in establishing.

Under his administration Donovan Hall, a men's dormitory, has been built. There have been numerous other improvements in buildings and grounds. But perhaps the greatest gain of the University lies in the College of Medicine and the proposed new medical center which Dr. Donovan was instrumental in having started.

Professors have been elevated to a higher level under his watchful eye. Their pay has been increased and there is more careful selection of new faculty members, due to his efforts.

Dr. Donovan has opposed any outside forces attempting to intimidate professors, and by so doing has made teachers free to present material to classes in the most beneficial manner. They no longer have to fear any forces controlling their lectures.

The students as well as the townspeople of Lexington have benefited from the construction of the Memorial Coliseum. This building allows a large number of persons to attend cultural events which would otherwise not be available to them. It also serves its prime purpose, that of presenting athletic contests to those who are interested. In this regard, largely through the efforts of Dr. Donovan, the relations of the University and the City of Lexington have been strengthened.

In dealings with the Boards of Trustees, Dr. Donovan feels that he has been extremely fortunate. He has had the greatest cooperation from

them and it is largely through the lack of friction that much of the work has been finished.

A love of the students is one of the chief characteristics of Dr. Donovan. His office has always been open to students, yet he has stated he regrets that he has not spent more time with the students, and that if he could start his career anew, he would certainly make a greater effort to have more contact with them.

He has seen the University through crises and triumphs, taking a touch of the sour with the sweet. And through it all he has stood steadfastly by the side of education in a belief that the campus of the University is the Commonwealth of Kentucky. He has done much to improve the welfare of the state through the instrumentality of the University.

In the retirement of Dr. Herman Lee Donovan the University is losing a great leader and champion of education.

But the University is fortunate in securing the services of Dr. Frank G. Dickey, the brilliant and genial young dean of the College of Education, as future president.

Dr. Dickey is a native of Oklahoma. He attended public schools in Texas and in Lexington. He did undergraduate work at Transylvania College, and he received his Master of Arts and Doctor of Education degrees from the University of Kentucky and he has done post-graduate work at Harvard.

He has served on the staff of the College of Education since 1947 and in 1949 he was chosen dean of that college. He has had vast experience in teaching and in dealing with students.

Dr. Dickey is young and personable and it is felt he can and will do much to advance the University to a higher level of service to the people of Kentucky as the institution approaches its centennial anniversary.

His task will not be an easy one but he has a united faculty, staff, and student body to give him support.

So it is that The Kernel, with nearly a half-century of tradition and memory riding behind its well-known nameplate, doffs its journalistic cap to Dr. Donovan for a job well done, brilliantly done, and kindly and thoughtfully done.

And to President-elect Dickey The Kernel expresses its sincere and best wishes, and here reaffirms its editorial policy (and that of all of us—administration, faculty, staff, alumni, and students)—the advancement of the University in all its undertakings at all times.

Graduation Exercises To Be Friday

Nearly 400 graduates will receive degrees at 8 p.m., Aug. 3, in Memorial Coliseum, according to Recorder Mary Page Milton.

Latest available figures show that 190 undergraduate degrees and 183 graduate degrees will be presented. Miss Milton indicated, however, that the figures might change before Commencement.

Dr. Frank G. Dickey, newly elected president of UK and dean of the College of Education, will deliver the Commencement address on "The Harvest of the Future." Dr. Frank Rose of Transylvania University will give the invocation.

The degrees will be presented by retiring President Herman L. Donovan.

Doctor's degrees will be given to 10 persons. Degrees of Master of Science and Master of Arts will be conferred upon 173 candidates.

The College of Arts and Sciences will award degrees to 53 graduates and the College of Engineering will award 41. Five Bachelor of Science in Agriculture degrees will be handed out and six Bachelor of Science in Home Economics degrees will be awarded.

Degrees will be given to 53 persons in the College of Education and 31 in the College of Commerce.

The College of Law is graduating only one person this summer.

Miss Milton expected that the figures for the graduation would change before the faculty meeting held Wednesday. The meeting was held to approve the awarding of degrees to the candidates.

KCB Indicates Engr's Grades —McDaniel

An Engineering student who scores below 39 percentile on the Kentucky Classification Battery has only one chance in eight to make a "C" standing during the year, Dr. Ernest McDaniel, director of UK's Personnel Department, said.

Dr. McDaniel has recently completed a survey comparing the results of the classification tests to the grades earned during the first year at the University.

The test scores of 200 Engineering freshmen were checked against their end-of-the-year grades. When the results were charted, they showed that the lower the score on the Kentucky Classification Battery, the less chance the student had of passing.

Of the group earning scores above 90 percentile on the KCB, 16 per cent made "D"; 45 per cent, "C"; 39 per cent, "B". Forty-four students of the 200 had scores above 90 percentile. The percentile score shows that a student scored higher than a certain per cent of his class. That is, if the percentile score is 90, the student has scored higher than 90 per cent of the class.

Of the 44 students scoring 80-90 percentile, 20 per cent made "D"; 64 per cent, "C"; and only 16 per cent earned a grade of "B". As the percentile score went down, the percentage of students making "D's" went up in almost perfect proportion.

Dr. McDaniel said that this is the first time the Personnel Department has made a study of the relationship of the end of the year grades to the KCB scores. He added that Dean Daniel V. Terrill, Engineering, has made similar studies which have produced the same results.

Dr. McDaniel plans to carry out similar studies in the other colleges of the University. Charts of the results will be used to help high school students decide what they will study when they get to college, he said.

Veterans' Checks

Veterans may sign for their G.I. Bill benefits through August 4 in room 104, Administration Building.

Mills To Speak At School Meet In Tennessee

Registrar Robert L. Mills has been invited to speak at a work conference of the National Citizens Council for Better Schools at Lookout Mt., Tenn. on Aug. 23-24.

Dr. Mills said the meeting will be made up largely of lay people, but will include some professional educators.

The subject of the meeting will be "Financing Schools in the South."

Dr. Mills served as a consultant to President Eisenhower's "White House Conference on Education" last year. He is regarded as an authority on education finances.

Dr. Edney Honored

Dr. J. M. Edney, Zoology, was guest of honor at a Thursday dinner, given by the graduating class of nurses of Good Samaritan. A copy of the class annual, dedicated to the professor, was presented to him at the same time.

Percentage of Freshman Engineering Students at Each Kentucky Classification Battery Level Earning Specified End-of-Year Grade Averages (N-200, Year 1954-1955)

KCB Percentile Score (total)	D 16%	C 45%	B 39%
90-99			
80-89	20%	64%	16%
70-79	27%	53%	18%
60-69	50%	50%	
50-59	62%	38%	
40-49	67%	33%	
30-39	80%	20%	
20 and below	94%	6%	

Grades-KCB Correlation

The chart above shows the relationship of the grades made by 200 engineering freshmen to the scores made on the Kentucky Classification Battery. The KCB tests were given before the students registered. The grades are end-of-the-year averages. The chart shows that as the KCB score decreases, the grades also go down. The chart was compiled by Dr. Ernest McDaniel, UK personnel director.

Schwendemans To Leave For Mexico Today

Dr. J. R. Schwendeman, professor of geography at the University, will conduct his annual tour of Mexico this summer, following the summer term.

Schwendeman, who will be assisted by his wife in escorting the group of fifteen, plans to leave Lexington August 3 and to return August 25. He said the tour this year will include an extra day in Monterrey, and that it will offer educational highlights.

He said the primary objective in the trip is educational and that geography studies will be directed in observation, lectures, and discussions.

Three semester hours credit will be given for the tour, to those who enroll for credit, but he said enrolling for credit is not necessary to accompany the group.

Included in the cost of \$350 is transportation, meals, lodging, tips, guides, and border charges.

Cities the group will visit in Mexico include Monterrey, Valles, Mexico City, Guadalupe, Taxco, and Acapulco. The group will make the trip in three cars.

Those making the trip will be Misses Olive Barrett, Antionette Harrison, Laura Parrish, Peggy Gray, Jeanette Pates, Jean Doyle, Freda Trosper, Mary Ann Anderson, and the Schwendeman's daughter, Beth Ann; Clifton Carpenter, J. R. Pates, and Mr. and Mrs. Milton Owen.

Georgia Campus Not As Pretty As UK — Kraps

"The University of Georgia campus is larger than UK's but it is not as pretty—it is too spread out."

These are the words of Rowland Kraps, a graduate of the University (January, '52) who was on the campus recently visiting friends he knew when he was a journalism student here. Currently, he is head of the printing department of the University of Georgia Press, and an assistant professor of journalism at the University at Athens, Ga.

From the time of his graduation until September, 1952, Kraps worked as a printer for a local newspaper, taking his present job then.

At Georgia, Kraps is associated with John E. Drewery, dean of the Henry W. Grady School of Journalism. Drewery instituted the Peabody Radio and Television Awards for radio programming.

"The library on the (Georgia) campus is beautiful," Kraps said, "with air conditioning and all the trimmings." He said there are about 500,000 volumes in the building. "But," he said, "the basketball gymnasium is very small."

"Controversial editorials," Kraps said, "can't be printed in the 'Red and Black' (the student newspaper) without prior approval of a board set up to control printing there." He said the school of journalism has "about 200-250" students registered.

Four Soldiers To Be Replaced In Military Dept.

Two officers and two non-commissioned officers of the staff of the military science department will be replaced next year, Col. Henry H. Rogers, professor of military science, said.

The changes will be completed by the time school starts in the fall, Col. Rogers said. The new officers will be Capt. Robert M. Robinson and Capt. Bruce A. Brigham. Master Sergeants Luther L. Baxter and John W. Morgan are the incoming enlisted personnel.

Leaving the department are Captains John M. Walton and Arthur L. Dudley. Walton is to be assigned to the Advanced Infantry Officer's Course at Ft. Benning, Ga. He is a graduate of the University, class of 1949, and he finished his military science course here as the highest rated cadet. Dudley is being assigned to Germany.

Enlisted members of the department who are leaving are Sergeant First Class Fred W. Sherwood and Master Sergeant C. A. Norman. Both men are to be reassigned overseas.

In addition to the above transfers, Col. William E. Grubbs will replace Col. Henry H. Rogers as professor of military science and tactics. This change was previously announced in the Kernel.

The first golf class at the University of Kentucky was started in 1932.

The Kentucky Kernel

Entered at the Post Office at Lexington, Kentucky, as second class matter under the Act of March 3, 1879. Published weekly during school except holidays and exams.

Donovan Finds Trowel In Desk

It looks like an ordinary garden trowel, but to Dr. H. L. Donovan, it's something special.

Except for a few scratches on the blade, it might have just come from the store. The varnish is still on the handle and the blade still has a shiny, chrome-like finish.

Dr. Donovan has never used the tool in his garden. In fact, he has only used it once.

For the past 6 years, it has been resting in the drawer of his desk in the Administration Building. Dr. Donovan rediscovered the trowel while he was cleaning out the desk to make room for the new president. Among his effects, Dr. Donovan found the trowel and the card.

The trowel was a gift from the Alumni Association. Few, if any, of the students on the campus today will remember when or how it was used, but everyone is familiar with the results.

Dr. Donovan laid the cornerstone for Memorial Coliseum with it in 1950.

The Kernel Press, including all of its machinery and equipment is worth an estimated \$200,000.

The first class graduated from the College of Law in June, 1910.

McLean stadium on Stoll Field has a capacity of 36,000 persons.

COLONEL of the WEEK

The Stirrup Cup is happy to announce another Kernel Editor as its Colonel of the Week.

His name is Graydon Hambrick, Managing Editor of the Kernel.

Mr. Hambrick is a journalism major.

It is rumored that he has a standing.

He is a senior.

He will graduate in January, he hopes.

Furthermore, he is hungry.

The Stirrup Cup hopes you enjoy your two delicious meals, Graydon.

Thompson Has Civil War Article Published By UI

The recent issue of "Civil War History," a journal published quarterly by the State University of Iowa, features an article on Civil War fiction by Dr. Lawrence S. Thompson, director of libraries at the University of Kentucky.

Dr. Thompson originally prepared the paper, entitled "From Oliver Optic to Scarlett O'Hara or the Delicious Vice and the House Divided," last February for a meeting of the Caxton Club, a group of book collectors in Chicago.

In the article the author reviews about 50 novels written about the "last romantic war," with added commentary that the "Civil War is and will remain sound background material for American fiction long after the centennial years 1960-1965."

AFROTC Men Complete Tour

Two officers and three enlisted instructors of the Air Science department have completed their tours of duty at UK and have been replaced in the department, Col. Robert S. Larson, professor of air science, said.

The officers, Capt. Robert L. Able and Capt. Montgomery D. Givens, have been replaced by Lt. Col. Albert H. Hutchinson Jr. and First Lt. James J. Romer. Lt. Col. Hutchinson has recently returned from Germany and Lt. Romer has just finished serving a tour of duty in Japan.

The departing enlisted members of the staff are Master Sergeants Barney E. Lee, who will be assigned to duty in Japan, and Leo DiStefano, who is going to Germany. Staff Sergeant Horace A. Cason is being assigned to the Philippine Islands.

These men are replaced by Master Sergeants C. H. Dunn, coming from Sedalia Air Force Base, Mo., and L. A. Peterson, from Newfoundland. Technical Sergeant W. H. McConnell is reporting to the University from Alaska.

J-Grad At Meet

Haskell Short, UK journalism graduate and former Kernelite, has been assigned by the United Press to cover the Democratic National Convention in Chicago. Mr. Short is bureau manager for the United Press in Columbus.

Work Underway On New Dorm For Women

Most of the steel to be used in constructing Holmes Hall, new dormitory for women, is in Lexington, Frank D. Peterson, vice president for Business Administration, has announced.

He said that the University has been assured delivery despite the recent steel strike.

The building area has been staked out and excavation of the basement is underway, he said.

The construction contract was given to the Gilson Construction Co. of Lexington. The building will cost \$1,131,000.

The brick, fireproof structure will be located on the northeast corner of South Limestone Street and Euclid Avenue. It will house 298 women. The building will have four floors and will occupy about 77,135 square feet.

Peterson said that the building is expected to be completed by September, 1957. The housing unit was named for Dean of Women Sarah B. Holmes.

Federal aid for the building was approved June 1, and the State Property and Building Commission approved the project four days later.

Peterson said the University would not receive bids for about a month on the sorority row to be built by the University.

Architects are still working on plans for the six houses. Razing of houses on the site of the \$800,000 project is almost finished. The sorority houses will be between Rose Street and Pennsylvania Avenue.

Welch To Visit Guatemala Soon

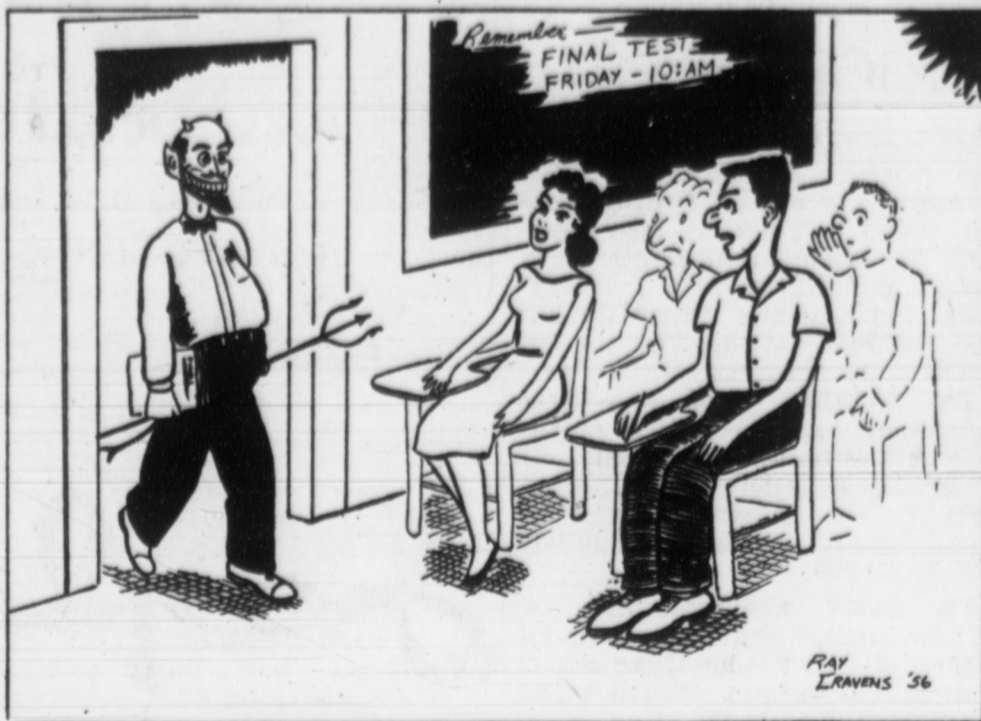

An appraisal of an International Cooperative Association program between the United States and Guatemala will be made by Dean of Agriculture Frank J. Welch when he visits that country this month.

The purpose of his visit to the Central American country will be to explore prospects for the establishment of reciprocal agricultural benefits through an ICA contract between the two nations.

While in Guatemala, Dean Welch will meet with agriculture leaders there to determine the best possible benefits that can be had by each nation, under the exchange program.

Following his visit to Guatemala, which is expected to continue for two weeks, Dean Welch will return to the United States prior to departing for Indonesia where he will confer with officials of the University of Indonesia on similar plans.

Campus Crossfire — by Ray Cravens

Remember—if he says Summer School has been hot, don't argue.

Halyard To Tour World

By BILL BRADLEY

Mrs. Camille Halyard, head of the Radio Arts Department, will begin a nine month world-wide tour on Sept. 1 when she sails from New York on the liner Ile de France. She has been granted sabbatical leave to make the tour on which she will study the national broadcasting systems of the world.

Mrs. Halyard will visit 36 foreign countries during her tour, some of which are off the beaten track for most American tourists, such as Kashmir, Territory of Kenya in South Africa, and Nepal on the India-Red China border. She has arranged her schedule to allow for a day or two of free time in most of the countries she will visit for sight-seeing. She has

visas for all non-Western European countries. She has had 12 inoculations and vaccinations. As an example of the unexpected requirements she had to fulfill in acquiring some of the visas, Mrs. Halyard mentioned that she had to send a statement from her banker as to her solvency before she was granted the Japanese visa.

Mrs. Halyard is to visit Germany, Austria, France, Spain, England, India, Thailand, Japan, Turkey, Burma, the Philippine Islands, Hong Kong, Hawaii, and the Holy Land.

She will be interested, primarily, in radio production and techniques in these countries, and she will consult with radio department officials as she travels from country to country.

She will also visit the facilities of Radio Free Europe, Radio Free Asia, the Voice of America, and the Armed Forces Network.

also arranged to travel by local surface transportation until she reaches Cairo in February. From there she will fly on the remainder of her journey, arriving in San Francisco June 4 from Honolulu.

This world tour, which Mrs. Halyard has been "hoping for, for 15 years," has involved three months of hectic activity since she actually started making plans. She has been given invaluable aid in arranging her schedule and clearances by the State Department, the United States Information Agency, of which the Voice of America is a branch, and by correspondents of the Associated Press, the United Press, and the NBC and CBS networks.

In addition to corresponding with all of these agencies and offices, Mrs. Halyard has had to secure

HS Juniors Given Test

A new testing plan is being inaugurated by the Counseling Division of the UK Personnel Department, Dr. Ernest McDaniel, personnel director, has announced.

Each year, thousands of high school seniors in Kentucky are tested by the service for guidance purposes, Dr. McDaniel said. Last spring, juniors as well as seniors were tested.

Along with 11,000 seniors, the tests were offered to about 4,000 high school juniors.

The tests are being given to the juniors to give the students a better chance to decide what the tests results show. Dr. McDaniel said that by the time the tests could be administered to the seniors, graded and returned to the school it was too late for them to be used to help many students. If the tests are given to juniors, the results will be available during the senior

year for counseling and guidance purposes, he said.

Dr. McDaniel said that some of the ineffectiveness of the tests is the result of the high school teachers not having enough information to interpret the results of the tests to the students. He added that part of the "fault" is with the University. We are trying to do "too much work with too little personnel."

"We are trying to get enough data about the tests to send out to the high school people," Dr. McDaniel said.

The Department is also changing its grading system, he said. Classification tests will be graded on IBM machines.
